

Board Proposal for Research Project

Request: Allow all 7th grade students and staff to take the color code test.

Reason for Request: This year, I am part of the Teacher Leader Cadre. As part of that we have been asked to participate in a research project that we believe will have a positive impact on your school. I am choosing the color code test project because I think it will fit right in to our Leader in Me and our redesign goals of developing the whole student and not just the academic part.

Purpose: Each 7th grader and 7th grade staff member will take the color code test. The results then will be displayed so that students and staff can build better relationships to help students achieve an environment that they can learn in. It will also help each student become a well-rounded person since the test will highlight strengths and weaknesses. The test will also help to improve communicate skills between staff and students. The results will also give information to staff about do's and don'ts for creating a safe environment for each result. The results should also help with team building skills by identifying strengths and weaknesses.

Additional Information: Website – colorcode.com Students will also be required to give their first and last name, zip code, age range, gender and email in order to get their results. Parents will be asked if their student can participate, a student without permission will not give their information.
