### ADDITIONAL DEFINITION FOR SCHOOL FACILITIES (Must use a minimum LOB listed below to qualify for this provision.)

e) School Facilities Definition - School facilities weighting is available for school districts whose adopted local option budget (LOB) e) School Facilities Definition - School racinities weighting is available to school districts whose adopted local option budget (LOB) is at least 25% for 2014-15 and have constructed an entirely new facility or an addition to an existing facility. Only eligible to schools that had a bond election prior to July 1, 2015 and bond money was used for construction of new facilities or new schools that were built primarily with federal funds on a military reservation located on USD 207 or USD 475.

The determination of weighting will be based upon the number of full-time equivalent (FTE) students that are enrolled and attending in the new facility September 20 (and February 20 for districts qualifying under K.S.A. 72-5139). In the case of school districts that have constructed an addition to existing facilities, the number of students that are enrolled and attending in the new classroom facility will be counted on a full-time equivalent basis (see example 2.) The additional weighting for this provision of the law is applicable for two years only. For a new facility, the FTE is for the entire building (see example 1). For additions to an existing facility, the following calculation would be utilized.

**Example #1: (For new buildings.)**For a totally new constructed building, the FTE equals the total enrollment FTE for that building.

	<u>Headcount</u>	<u>FTE</u>
Kindergarten	77	77.0
Grade 1	87	87.0
Grade 2	81	81.0
Grade 3	75	75.0
Weighting for example:		320.0 X 0.25 = 80.0 X \$4,569 = \$365,520

### Example #2: (For new additions)

Total number of students in each new classroom Number of class periods (divide by) Full-time equivalent enrollment =		
New classroom A =	105	students for the day
New classroom B =	154	students for the day
New classroom C =	133	students for the day
New classroom D =	121	students for the day
TOTAL =	513	· ·
divide by	7	class periods
=	73.3	FTE
	Number of class periods (divide by) Full-time equivalent enrollment =  New classroom A =  New classroom B =  New classroom C =  New classroom D =  TOTAL =	Number of class periods (divide by)         Full-time equivalent enrollment =         New classroom A =       105         New classroom B =       154         New classroom C =       133         New classroom D =       121         TOTAL =       513

Weighting for above example:  $73.3 \times 0.25 = 18.3 \times $4,569 = $83,613$ .
