

December 2nd, 2024

USD 434 Board of Education
Santa Fe Trail
104 S Burlingame Rd
Scranton KS 66537

Attention Faith Flory,

Congratulations! As part of the state of Kansas's Advancing Digital Opportunities to Promote Technology (ADOPT) program, your school district has been selected to receive computer equipment for your students. The ADOPT program, administered by the Kansas Department of Commerce using the Coronavirus Capital Projects Fund, seeks to significantly enhance digital literacy and access in rural Kansas through the distribution of computer equipment to eligible grade levels within the Kansas State Rural Education Center (REC) support network.

As part of this program, your school district will receive the following equipment, provided by Kansas State through our collaborator, Riverside Technologies Inc. (RTI):

- 58 ASUS Tablets for Students in Grades K-6
- 100 HP Chromebooks (8Gb Ram) for Students in Grades 9-12

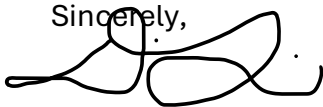

As a recipient in the ADOPT program, your district is expected to:

1. Complete quarterly reports on number of devices distributed through the program
2. Provide documentation of maintenance/replacements of devices as needed and
3. Verify and authenticate tracking data of devices provided by RTI.

Should you have any questions, please do not hesitate to reach out.

Congratulations again and we look forward to working with you!

Sincerely,

Dillon Simmons, Principal Investigator (PI)
